The Aeronautical Quarterly

A Journal devoted to
Aeronautics and the Allied Sciences

EDITORIAL BOARD

PROFESSOR W A MAIR (*Chairman*)
CBE, MA, FRAeS

SIR ARNOLD HALL
MA, FRS, HonFRAeS, HonFAIAA

DR J H HORLOCK
MA, PhD, FRS, FRAeS

LORD KINGS NORTON
DSc, DIC, PhD, HonFRAeS, FAIAA

SIR MORIEN MORGAN
CB, MA, FRS, FRAeS

SIR ALFRED PUGSLEY
OBE, DSc, FRS, HonFRAeS

PROFESSOR S C REDSHAW
DSc, PhD, FRAeS, FICE, FIStructE

SIR OWEN SAUNDERS
FRS, FRAeS

PROFESSOR W H WITTRICK
ScD, PhD, FRAeS

EDITOR

MISS E C PIKE
MA, FRAeS

VOLUME XXVIII

FEBRUARY 1977 — NOVEMBER 1977

Printed by Technical Editing and Reproduction Ltd, Harford House, 7–9 Charlotte St, London, W1P 1HD
and Published by
The Royal Aeronautical Society, 4 Hamilton Place, London, W1V 0BQ

AUTHOR INDEX

(Volume XXVIII)

ADAMS, N J I and MUNRO, H G
The relationship of the resistance curve and G_c to specimen configuration, p 28 (February).

ANDERSON, D A and NANGIA, R K
Comparison of numerical and experimental "conical" flow fields in supersonic corners with compression and/or expansion, p 293 (November).

BAND, E G U *see* PAYNE, P R

BOCCI, A J
A new series of aerofoil sections suitable for aircraft propellers, p 59 (February).

CLAPWORTHY, G J
Subcritical flow without circulation past a swept semi-infinite elliptic cylinder, p 142 (May).

CURLE, N
An accurate calculation method for two-dimensional laminar boundary layers, including cases with regions of sharp pressure gradient, p 149 (August).

DANESHYAR, H *see* HORLOCK, J H

FERNHOLZ, H H *see* VAGT, J-D

GALBRAITH, R A McD, SJOLANDER, S and HEAD, M R
Mixing length in the wall region of turbulent boundary layers, p 97 (May).

GRAF, W O *see* REID, L D

HEAD, M R *see* GALBRAITH, R A McD

HEAD, M R, PRAHLAD, T S and PHILLIPS, W R C
Transition to a rising core at the centre of a vortex. Simplified analysis for laminar flow, p 197 (August). Correspondence, p 306 (November).

HILLIER, R and WOODS, B A
A note on the thin-shock-layer approximation, p 85 (May).

HOLT, P J and WEBBER, J P H
Finite elements for curved sandwich beams, p 123 (May).

HORLOCK, J H and DANESHYAR, H
Turbomachinery waves, p 1 (February).

HUGHES, T *see* SMITH, D J

LAIDLER, P and WALKDEN, F
The design of axisymmetric ducts for incompressible flow, p 21 (February).

MARKOV, A B *see* REID, L D

MORIKAWA, Y *see* TSUJI, Y

MUNRO, H G *see* ADAMS, N J I

MURTHY, A V *see* STOLLERY, J L

MYRING, D F
The effect of sweep on conditions at separation in turbulent boundary-layer/shock-wave interaction, p 111 (May).

NAGATANI, T *see* TSUJI, Y

NANGIA, R K *see* ANDERSON, D A

NIXON, D
An alternative treatment of boundary conditions for the flow over thick wings, p 90 (May).

PAYNE, P R and BAND, E G U
A note related to the pressure inside an inflated parachute canopy, p 271 (November).

PETRIE, J A H
Chordwise variation of vorticity: A comparison of approximations for use in panel methods, p 265 (November).

PHILLIPS, W R C *see* HEAD, M R

PIERSON, B L
Maximum altitude sailplane winch-launch trajectories, p 75 (May).

PRAHLAD, T S *see* HEAD, M R

REID, L D, MARKOV, A B and GRAF, W O
A comparison of techniques for estimating STOL aircraft response to low altitude turbulence, p 278 (November).

SAKOU, M *see* TSUJI, Y

SAMPSON, R G
An experimental and theoretical investigation of the structure of a trailing vortex wake, p 39 (February).

SIMMONS, J E L
Similarities between two-dimensional and axisymmetric vortex wakes, p 15 (February).

SIMPSON, A
An algorithm for autonomous non-linear dynamical equations, p 211 (August).

SJOLANDER, S *see* GALBRAITH, R A McD

SMITH, D J and HUGHES, T
Some measurements in a turbulent circular jet in the presence of a co-flowing free stream, p 185 (August).

STOLLERY, J L and MURTHY, A V
An intermittent high-Reynolds-number wind tunnel, p 259 (November).

TAYLOR, P
An investigation of an inclined jet in a crosswind, p 51 (February).

THOMSON, K D
Subsonic wing-body interference for missile configurations at large angles of attack, p 163 (August).

TSUJI, Y, MORIKAWA, Y and SAKOU, M
The stability of a radial wall jet, p 247 (November).

TSUJI, Y, MORIKAWA, Y, NAGATANI, T and SAKOU, M
The stability of a two-dimensional wall jet, p 235 (November).

VAGT, J-D and FERNHOLZ, H H
Wall interference effects of static pressure probes in an incompressible turbulent boundary layer, p 176 (August).

WALKDEN, F *see* LAIDLER, P

WEBBER, J P H *see* HOLT, P J

WOODS, B A *see* HILLIER, R

SUBJECT INDEX TO VOLUME XXVIII – 1977

AERODYNAMICS
See also Aerofoils, Boundary layers
Corner flow, Ducts, Jets, Missiles, Vorticity
A note on the thin-shock-layer approximation, R Hillier and B A Woods, p 85 (May).
An alternative treatment of boundary conditions for the flow over thick wings, D Nixon, p 90 (May).
Subcritical flow without circulation past a swept semi-infinite elliptic cylinder, G J Clapworthy, p 142 (May).

AEROFOILS
A new series of aerofoil sections suitable for aircraft propellers, A J Bocci, p 59 (February).

BOUNDARY LAYERS
See also Pressure probes
An accurate calculation method for two-dimensional laminar boundary layers, including cases with regions of sharp pressure gradient, N Curle, p 149 (August).
Mixing length in the wall region of turbulent boundary layers, R A McD Galbraith, S Sjolander and M R Head, p 97 (May).
The effect of sweep on conditions at separation in turbulent boundary-layer/shock-wave interaction, D F Myring, p 111 (May).

CORNER FLOW
Comparison of numerical and experimental "conical" flow fields in supersonic corners with compression and/or expansion, D A Anderson and R K Nangia, p 293 (November).

CRACK GROWTH
The relationship of the resistance curve and G_c to specimen configuration, N J I Adams and H G Munro, p 28 (February).

DUCTS
The design of axisymmetric ducts for incompressible flow, P Laidler and F Walkden, p 21 (February).

FINITE ELEMENTS
Finite elements for curved sandwich beams, P J Holt and J P H Webber, p 123 (May).

INTERFERENCE EFFECTS
See Missiles, Pressure probes

JETS
An investigation of an inclined jet in a crosswind, P Taylor, p 51 (February).
Some measurements in a turbulent circular jet in the presence of a co-flowing free stream, D J Smith and T Hughes, p 185 (August).
The stability of a radial wall jet, Y Tsuji, Y Morikawa and M Sakou, p 247 (November).
The stability of a two-dimensional wall jet, Y Tsuji, Y Morikawa, T Nagatani and M Sakou, p 235 (November).

MATHEMATICS
An algorithm for autonomous non-linear dynamical equations, A Simpson, p 211 (August).

MISSILES
Subsonic wing-body interference for missile configurations at large angles of attack, K D Thomson, p 163 (August).

MIXING LENGTH
See Boundary layers

PARACHUTES
A note related to the pressure inside an inflated parachute canopy, P R Payne and E G U Band, p 271 (November).

PRESSURE PROBES
Wall interference effects of static pressure probes in an incompressible turbulent boundary layer, J-D Vagt and H H Fernholz, p 176 (August).

SAILPLANES
Maximum altitude sailplane winch-launch trajectories, B L Pierson, p 75 (May).

SANDWICH BEAMS
See Finite elements

STOL AIRCRAFT
A comparison of techniques for estimating STOL aircraft response to low altitude turbulence, L D Reid, A B Markov and W O Graf, p 278 (November).

TURBOMACHINES
Turbomachinery waves, J H Horlock and H Daneshyar, p 1 (February).

VORTICITY
An experimental and theoretical investigation of the structure of a trailing vortex wake, R G Sampson, p 39 (February).
Chordwise variation of vorticity: A comparison of approximations for use in panel methods, J A H Petrie, p 265 (November).
Similarities between two-dimensional and axisymmetric vortex wakes, J E L Simmons, p 15 (February).
Transition to a rising core at the centre of a vortex. Simplified analysis for laminar flow, M R Head, T S Prahlad and W R C Phillips, p 197 (August). Correspondence, p 306 (November).

WAKES
See Vorticity

WIND TUNNELS
An intermittent high-Reynolds-number wind tunnel, J L Stollery and A V Murthy, p 259 (November).
